3.2.0.0 is compatible with Microsoft
Windows 10, 8.1 and 8.0, 7, Vista SP2 (x32
& x64). Professional Renamer is a good
product. I found it to be easy to use, simple
to navigate through, and reliable. The
problem with this program is that it does
not recognize some of the most commonly
used file extensions. I have 4 video files of
different extensions (.avi.wmv.flv.mov) and
it still renames them as.mp3. The only

solution that I have found to this problem is to create a batch file to replace the file extension with what you want. Is there a way to get this to be a "native" extension for this program? Professional Renamer 2017. b7e8fdf5c8
