LC Batch Renamer Crack + [Win/Mac]

LC Batch Renamer Serial Key is a small program designed to batch rename files. This software is relatively new and requires a minimum of administration. Unfortunately, the application only allows batch renaming to complete. To start the process, the user will be prompted to input a file, and it must be placed either on the host's system or on the flash drive. LC Batch Renamer is not intended as a replacement for other applications, but it does offer a fair set of easy to use renaming options. LC Batch Renamer is not the right tool to do serious file renaming or moving, since it lacks many important editing features. As previously discussed, it's best to test it on something you don't really care about, since the application can't offer much resistance to changes.
